

THE WILSON PRACTICE

Patient Update 12 February 2021

End of Week vaccination update.

Further to our update earlier in the week we can report that the Vaccination Programme is progressing fantastically well with **3528** of our patients having received a COVID vaccine.

We believe **100%** of our over 80 age group who are able and willing to receive the vaccine currently have been vaccinated.

95% of the 75-79 age group have been vaccinated.

Patients over the age of 65 are now being vaccinated and have been receiving their invites.

We are aware that there may be a very small number of people in these groups who have not yet been contacted, or who have been invited and who have, for whatever reason, not yet booked to be vaccinated.

If this includes you, or someone you know...

Please contact the NHS online booking service at www.nhs.uk or, if you cannot get online, telephone 119 or the surgery.

Anyone outside of these groups should still wait to be contacted by the practice or the national booking system.
