NHS COVID Pass digital service for international travel (including 'Fit to Fly').

From 3 February 2022, anyone 12y and over, can get a digital NHS COVID Pass for international travel. The Wilson Practice is not providing a 'Fit to Fly' examination, service or letter for this, it is recommending the NHS COVID pass.

A digital NHS COVID Pass will:

- provide a record of COVID-19 vaccinations received.
- show evidence of recovery for 180 days following a positive NHS PCR test.

You can order a digital NHS COVID Pass a number of ways, depending on your age:

- For those aged 12 and over, via the [NHS.UK website](https://www.nhs.uk) (you can download or print a PDF).
- For those aged 13 and over (as age restrictions apply for use of the NHS App.) via the [NHS App](https://www.nhs.uk).

To get an NHS COVID Pass for you or your child, you/they (or you on their behalf) will first need to register for an NHS login. Once logged in, click on 'Travel'. You/they will be asked to prove their identity.

If you or your child are 13 or over, you/they will need to:

- register for an NHS login using your/their email address and enter your/their details as recorded at the GP.
- take a photo of your/their photo ID (such as their passport).
- record a short video of your/their face saying the 4 digits as shown on screen (this is to provide a physical match to your/their photo ID).

Once you or your child have submitted this information to prove your/their identity (or you've helped them to do it), it will then be checked to ensure a correct match to your/the child's NHS record.

This usually takes a few hours, but during busy periods may take a few days. You/they should ensure that you/they have registered and proved your/their identity well in advance of international travel.

Alternatively, a google search will give you several private firms that offer 'Fit to Fly' services.
